

# One developer, 3x productivity

- Business logic reused (data models, APIs, UI independent components, statistics, ads)
- Shared knowledge, single language, better product quality
- Hot reloading
- **You still use the same quality patterns as before**

# BDD (rspec)

test\_api.js

```
1  import { expect } from 'chai'
2  import API from '../../app/networking/api'
3  import fetch_mock from './mock'
4
5  describe('API', () => {
6    it('Should properly create query from parameters', () => {
7      expect(API.createGETParameters({foo: "bar"},
8                                     {lorem: "ipsum"},
9                                     {intval: 15},
10                                    {special: "!@#%^&*()-+?\"})).to.equal('foo=bar&
lorem=ipsum&intval=15&special=!%40%23%24%25%5E%26*()
-%2B%3F')
11    })
12
```
