

Performance - are we there yet?

- 60 fps: $1000/60 = \sim 16.6$ milliseconds to render everything
- Asynchronous communication - no deadlocks

Performance - are we there yet?

- 60 fps: $1000/60 = \sim 16.6$ milliseconds to render everything
- Asynchronous communication - no deadlocks
- Asynchronicity is sometimes VERY bad.
