

# How to: Prepare fastlane match

The screenshot shows the Xcode interface. On the left is a sidebar with a project tree containing 'Products' and 'Frameworks'. The main area is divided into two panes. The left pane, titled 'TARGETS', shows a list of targets: 'RNExample' (highlighted with a blue bar and an Apple logo icon) and 'RNExampleTests' (with a folder icon). The right pane shows the configuration for the 'RNExample' target. It includes fields for 'Display Name' (React Native Example), 'Bundle Identifier' (pl.wp.rncdexample), 'Version' (1.0), and 'Build' (2). Below these are three sections: 'Signing' with an unchecked checkbox for 'Automatically manage signing'; 'Signing (Debug)' with 'Provisioning Profile' set to 'match Development pl.wp.rncdexample', 'Team' set to 'Wirtualna Polska', and 'Signing Certificate' set to 'iPhone Developer: Daniel Kwidzinski (E66K6GY9...)' (highlighted with a red underline); and 'Signing (Release)' with 'Provisioning Profile' set to 'match AppStore pl.wp.rncdexample', 'Team' set to 'Wirtualna Polska', and 'Signing Certificate' set to 'iPhone Distribution: Wirtualna Polska (FWL6GR5...)' (highlighted with a red underline).

**TARGETS**

- RNExample
- RNExampleTests

**Display Name** React Native Example

**Bundle Identifier** pl.wp.rncdexample

**Version** 1.0

**Build** 2

▼ **Signing**

☐ Automatically manage signing  
Xcode will create and update profiles, app IDs, and certificates.

▼ **Signing (Debug)**

**Provisioning Profile** match Development pl.wp.rncdexample ⓘ

**Team** Wirtualna Polska

**Signing Certificate** iPhone Developer: Daniel Kwidzinski (E66K6GY9...)

▼ **Signing (Release)**

**Provisioning Profile** match AppStore pl.wp.rncdexample ⓘ

**Team** Wirtualna Polska

**Signing Certificate** iPhone Distribution: Wirtualna Polska (FWL6GR5...)

# How to: Prepare fastlane match

- `fastlane match appstore`
- Set proper provisioning in Xcode
- **`fastlane beta`**
