Service Worker

```js
JS index.js    ✕

 1    import Head from "next/head";
 2
 3    export default class extends React.Component {
 4      componentDidMount = () => {
 5        if ("serviceWorker" in navigator) {
 6          navigator.serviceWorker
 7            .register("/service-worker.js")
 8            .then(registration => {
 9              console.log("service worker registration successful");
10            })
11            .catch(err => {
12              console.warn("service worker registration failed", err.message);
13            });
14        }
15      };
16
17      render() {
18        return (
19          <Head>
20            <link rel="manifest" href="/static/manifest.webmanifest" />
21          </Head>
22        );
23      }
24    }
25
```

Service Worker

```js
const SWPrecacheWebpackPlugin = require("sw-precache-webpack-plugin");

module.exports = {
  webpack: config => {
    config.plugins.push(
      new SWPrecacheWebpackPlugin({
        staticFileGlobsIgnorePatterns: [/\.next\//],
        runtimeCaching: [
          { urlPattern: /https:\/\/pudelekpwa\.herokuapp.com/, handler: "fastest" },
        ],
      }),
    );

    return config;
  },
};
```
