☰ FancyViewManager.kt ✕

```kotlin
1   package pl.wp.wdi
2
3   import android.graphics.Color;
4   import android.view.View
5
6   import com.facebook.react.uimanager.SimpleViewManager
7   import com.facebook.react.uimanager.ThemedReactContext
8
9   class FancyViewManager: SimpleViewManager<View>() {
10      override fun getName(): String {
11          return "FancyViewManager"
12      }
13
14      override fun createViewInstance(reactContext: ThemedReactContext?): View {
15          var view = View(reactContext);
16          view.setBackgroundColor(Color.MAGENTA);
17          return view
18      }
19  }
20
```
