Client: URLSession task

Movibe

```swift
let body = ["query" : "{ articles(cid: 0, t:[Article]) { title url img { url b64 } } }"]

let url = URL(string: "http://37.233.102.67:5000/graphql")!
let request = NSMutableURLRequest(url: url)

request.httpBody = try? JSONSerialization.data(withJSONObject: body, options: [])
request.httpMethod = "POST"
request.addValue("application/json", forHTTPHeaderField: "Content-Type")

let session = URLSession(configuration: URLSessionConfiguration.default)
let task = session.dataTask(with: request as URLRequest) { (data, response, error) in
    // Do everything here
}

task.resume()
```
